INDEX TO VOLUME 24

AUTHOR INDEX

Accortt, J. I.
Fine particulate removal and SO_2 absorption with a two stage wet scrubber, 966
Ackerman, B.
Wind fields over the St. Louis metropolitan area, 232
Adams, R. L.
Designing a filter system to meet specified efficiency and emissions levels, 1168
Akland, G. G.
Laboratory performance analysis of simulated ambient SO_2 bubbler samples: a survey, 1073
Albrecht, R. M.
Discussion of "biological effects of microwave radiation", 128
Ayres, R. U.
Economic impact of mass production of alternative low emission automotive power systems, 216
Baity, F. W., Jr.
Methodology for comparison of open-path monitors with point monitors, 1044
Bakke, E.
Optimizing filtration parameters, 1150
Barrett, T. W.
Sensitivity of native desert vegetation to SO_2 and to SO_2 and NO_2 combined, 153
Barthel, C. E., Jr.
Closing address: Third International Clean Air Congress, 20
Bascunana, J. L.
Divided combustion chamber gasoline engines: a review for emissions and efficiency, 674
Baumgardner, R. E., Jr.
Methodology for comparison of open-path monitors with point monitors, 1044
Beeckmans, J. M.
Effects of water injection arrangement on the performance of a venturi scrubber, 943
Beery, W. T.
"Clean air and energy—what next?", 542
Behar, J. V.
Airborne survey of major air basins in California, 645
Behie, S. W.
Effects of water injection arrangement on the performance of a venturi scrubber, 943
Belgea, F. J.
Derivation, application and interrelationship of ambient noise measurement parameters, 1080
Benson, J. R.
Costs of air cleaning with electrostatic precipitators at TVA steam plants, 339
Berglund, B.
Measurement of rapid changes of odor concentration by a signal detection approach, 162
Berglund, U.
Measurement of rapid changes of odor concentration by a signal detection approach, 162
Bergmann, L.
New fabrics and their potential application, 1187
Beutner, H. P.
Measurement of opacity and particulate emissions with an on-stack transmissometer, 865
Bickelhaupt, R. E.
Electrical volume conduction in fly ash, 251
Block, G.
Air pollution patterns in New York City, 148
Asthma and air pollution in two inner city areas in New York city, 665
Bohn, H. L.
Filtration of airborne particulates by gravel filters: I. initial collection efficiency of a gravel layer, 1051
Boll, R. H.
Mean drop size in a full scale venturi scrubber via transmissometer, 934
Bowne, N. E.
Diffusion rates, 832
Bradburn, G.
Airborne survey of major air basins in California, 645
Brayton, W. E.
Emission control in coking operations by use of stage charging, 1059
Brenchley, D. L.
Barium retention in rats exposed to combustion products from diesel fuel containing a barium-based antismoke additive, 40
Bromberg, S. M.
Laboratory performance analysis of simulated ambient SO_2 bubbler samples: a survey, 1073
Burchard, J. K.
Significance of particulate emissions, 1141
Burnham, C. D.
Why belong to APCA? 1126
Caccavari, C.
Background noise study in Chicago, 240
Calvert, S.
Engineering design of fine particle scrubbers, 929
Entrainment separators for scrubbers, 971
Flux force-condensation scrubbing, 946
Caplan, K. J.
Needed research in fabric filtration, 1194
Carlton-Jones, D.
Electrostatic precipitation of fly ash reaches fiftieth anniversary, 1035
Cass, R. W.
Mobile fabric filter system: design and preliminary results, 1177
Cheng, L.
Nomogram for relating particle and particle cloud parameters, 680
Chiang, J. J.
Spectrophotometric determination of atmospheric acidity by displacement of the equilibrium of acid-base indicators, 671
Coffey, P. E.
Rural and urban ozone relationships in New York state, 564
Collom, R. H.
The Georgia tall stack standard and the energy crisis, 479
Cooper, D. W.
Fine particle fabric filtration, 1196
Corn, M.
Costs of air cleaning with electrostatic precipitators at TVA steam plants, 339
Countess, R. J.
Production of aerosol by high volume samplers, 605
Coy, D. W.
Commentary on "hot" versus "enlarged" electrostatic precipitation of fly ash: a cost-effectiveness study, 872
Craig, A. B.
Symposium objectives, 927
Crawford, T. V.
Cooling pond steam fog, 860
Currier, E. L.
Cooling pond steam fog, 860
Dale, J. T.
Evaluation of emissions and control technologies for the web offset (lithography) process, 484
Evaluation of emissions and control technologies for the metal decorating process, 579
Dalla Betta, R. A.
Laboratory method for the simulation of automobile exhaust and studies of catalyst poisoning, 596
Daniel, W. A.
Ambient air quality and automotive emission control, 849
de Nevers, N.
An air quality approach to natural gas curtailment, 211
Dennis, R.
Collection efficiency as a function of particle size, shape, and density: theory and experience, 1156
Derham, R. L.
Relation between the indoor and outdoor concentrations of nitrogen oxides, 158
Drehmel, D. C.
Closing comments, 978
Drivas, P. J.
Inexpensive remote sequential air sampler, 776
Eccleston, A. J.
Scattering coefficient and mass concentration of smoke from Australian forest fires, 1047
Eckert, J. S.
Performance of wet scrubbers on liquid and solid particulate matter, 961
Egan, D. W.
Measurement of exhaust emissions in piston and diesel engines by dispersive spectroscopy, 136
Eisaman, P. R.
Evaluation of emissions and control technologies for the web offset (lithography) process, 484
Evaluation of emissions and control technologies for the metal decorating process, 579
Englund, H. M.
Reflections: Third International Clean Air Congress, 19
Feldstein, M.
Regulations for the control of hydrocarbon emissions from stationary sources: a critical review, 469
First, M. W.
Control of odors and aerosols from spent grain dryers, 653
New kinds of fabric filtration devices, 1192
Fishelson, G.
Taxing emissions: a theoretical note, 44
Flais, L. R.
Mean drop size in a full scale venturi scrubber via transmissometer, 934
Frederick, E. R.
Some effects of electrostatic charges in fabric filtration, 1164
Frey, R. E.
Types of fabric filter installations, 1148
Frisch, N. W.
Commentary on "hot" versus "enlarged" electrostatic precipitation of fly ash: a cost-effectiveness study, 872
Frizzola, J. A.
Air pollution incident due to a stationary front, 140
Gadomski, R. R.
Evaluation of emissions and control technologies for the web offset (lithography) process, 484
Evaluation of emissions and control technologies for the metal decorating process, 579
Gardenier, H. E.
Submicron particulate scrubbing with a two phase jet scrubber, 954
Genscher, H.-D.
Technology and environment, 15
Gilmore, T. M.
Regional monitoring of ambient air carbon monoxide in Fairbanks, Alaska, 1077
Gimbrone, A. V.
Evaluation of emissions and control technologies for the web offset (lithography) process, 484
Evaluation of emissions and control technologies for the metal decorating process, 579
Gitchell, A.
Inhibition of photochemical smog. I. Inhibition by phenol, benzaldehyde, and aniline, 357
Inhibition of photochemical smog. II. inhibition by hexafluorobenzene, nitrobenzene, naphthalene, and 2,6-di-tert-butyl-4-methylphenol, 772
Gloria, H. R.
Airborne survey of major air basins in California, 645
Goldbloom, V. C.
Long term goals for environmental control—what's desirable and possible in the year 2000? 743
Goldstein, I. F.
Air pollution patterns in New York City, 148
Asthma and air pollution in two inner city areas in New York city, 665
Govan, J. H.
Control of odors and aerosols from spent grain dryers, 653
Gray, R. A.
Methodology for comparison of open-path monitors with point monitors, 1044
Green, W. J.
Evaluation of emissions and control

technologies for the web offset (lithography) process, 484
Evaluation of emissions and control technologies for the metal decorating process, 579
Griffith, G. A.
Inexpensive remote sequential air sampler, 776
Gutwein, E. E.
Barium retention in rats exposed to combustion products from diesel fuel containing a barium-based antismoke additive, 40
Haaland, H. M.
Panel discussion, 976
Hall, R. R.
Mobile fabric filter system: design and preliminary results, 1177
Hanna, T. R.
Regional monitoring of ambient air carbon monoxide in Fairbanks, Alaska, 1077
Harrington, R. E.
Fine particulates—the misunderstood air pollutant, 927
Harrison, P. R.
Mercury concentration in the atmosphere in Chicago. a new ultrasensitive method employing amalgamation, 778
Hatch, J. E.
Chlorine control by in-line fluxing operations, 145
Heicklen, J.
Inhibition of photochemical smog. I. Inhibition by phenol, benzaldehyde, and aniline, 357
Inhibition of photochemical smog. II. inhibition by hexafluorobenzene, nitrobenzene, naphthalene, and 2,6-di-tert-butyl-4-methylphenol, 772
Heinemann, G. W.
Welcoming remarks: Third International Clean Air Congress, 14
Heitner, K. L.
Approach to air quality management standards, 1039
Hellman, T. M.
Characterization of the odor properties of 101 petrochemicals using sensory methods, 979
Hemsath, K. H.
Air pollution control in the carbon baking process, 60
Herrick, R. A.
Activities mean opportunity, 6
Hesketh, H. E.
Fine particle collection efficiency related to pressure drop, scrubbant and particle properties, and contact mechanism, 939
Hester, N. E.
Fluorocarbons in the Los Angeles basin, 591
Heuss, J. M.
Ambient air quality and automotive emission control, 849
High, M. D.
Background, preparation and use of environmental impact statements, a review, 111
Hilborn, J.
Atmospheric sample pumps—a possible source of error in total hydrocarbon, methane, and carbon monoxide measurement, 983
Hildebrandt, P. W.
What are we doing? 1030
Hill, A. C.
Sensitivity of native desert vegetation to SO_2 and to SO_2 and NO_2 combined, 153
Hill, S.
Sensitivity of native desert vegetation to SO_2 and to SO_2 and NO_2 combined, 153
Hinton, L. V.
State standards, regulations, and responsibilities in noise pollution control, 130
Holmes, J. G.
Federal aircraft emission control program: standards and their basis, 23
Holston, R. M.
Computer assisted air quality enforcement, 1084
Jackson, M. L.
Particle-molecule collection by sonic flow impingers, 569
Jashnani, I. L.
Entrainment separators for scrubbers, 971
Jhaveri, N. C.
Flux force-condensation scrubbing, 946
Johnson, F. L.
Measurement of exhaust emissions in piston and diesel engines by dispersive spectroscopy, 136
Jones, K. H.
Federal aircraft emission control program: standards and their basis, 23
Justus, C. G.
Evaluation of nationwide health costs of air pollution and cigarette smoking, 1063
The Georgia tall stack standard and the energy crisis, 479
Kertcher, L. F.
Economics of coke oven charging controls, 765
King, N. K.
Scattering coefficient and mass concentration of smoke from Australian forest fires, 1047
Kneese, A.
Long term goals for environmental control—what's desirable and possible in the year 2000? 743
Knox, J. B.
Cooling pond steam fog, 860
Numerical modeling of the transport diffusion and deposition of pollutants for regions and extended scales, 660
Surface air pollutant concentration frequency distributions: implications for urban modeling, 48
Kreith, F.
Removal of SO_2 from low sulfur coal combustion gases by limestone scrubbing, 29
Krier, J. E.
Approach to air quality management standards, 1039
Lagarias, J. S.
On being the right size, 638
Lamb, C.
Sensitivity of native desert vegetation to SO_2 and to SO_2 and NO_2 combined, 153
Landolt, R. R.
Barium retention in rats exposed to combustion products from diesel fuel containing a barium-based antismoke additive, 40
Landovitz, L.
Air pollution patterns in New York City, 148
Lange, R.
Surface air pollutant concentration frequency distributions: implications for urban modeling, 48
Larsen, R. I.
Air quality data analysis system for interrelating effects, standards, and needed source reductions—part 2, 551
Lear, C. W.
Panel discussion, 976
Leith, W. C.
Rotating concentric "homogeneous turbulence" gas scrubber, 969
Leonardos, G.
Regulations for the control of odors: a critical review, 456
Lewis, R. E.
Emission control in coking operations by use of stage charging, 1059
Lindvall, T.
Measurement of rapid changes of odor concentration by a signal detection approach, 162
Linsky, B.
Economics of coke oven charging controls, 765
Lipscomb, W. O.
Performance and cost comparisons between fabric filters and alternate particulate control techniques, 1144
Liu, B. Y. H.
Laboratory generation of particulates with emphasis on submicron aerosols, 1170
Portable electrical analyzer for size distribution measurement of submicron aerosols, 1067
Lombardo, L. V.
Four crises: air pollution, energy, cost of living, and confidence in government, 104
Lord, H. C.
Measurement of exhaust emissions in piston and diesel engines by dispersive spectroscopy, 136
Lorentz, R. C.
Panel discussion, 976
McCain, J. D.
Methods for determining particulate mass and size properties: laboratory and field measurements, 1172
Performance of a steam-ejector scrubber, 958
McClenny, W. A.
Methodology for comparison of open-path monitors with point monitors, 1044
Mc Intosh, L. D.
Measurement of exhaust emissions in piston and diesel engines by dispersive spectroscopy, 136
McKee, H. C.
Texas regulation requires control of opacity using instrumental measurements, 601
McKenna, J. D.
Performance and cost comparisons between fabric filters and alternate particulate control techniques, 1144
MacKinnon, D. J.
Nitric oxide formation at high temperatures, 237
McRee, D. I.
Biological effects of microwave radiation, 122
Martin, J. R.
Fine particulate removal and SO_2 absorption with a two stage wet scrubber, 966
Panel discussion, 976
Maurer, P. W.
Mean drop size in a full scale venturi scrubber via transmissometer, 934
Mazei, A. E.
Computer assisted air quality enforcement, 1084
Meyer, A. F., Jr.
An overview of EPA's implementation of the Noise Control Act of 1972, 830
Miyamoto, S.
Filtration of airborne particulates by gravel filters: I. initial collection efficiency of a gravel layer, 1051
Moeller, D. W.
Crisis in air pollution manpower development, 825
Morse, H. N.
Alton and Southern Railway Company v. Illinois Pollution Control Board, 292
Anaconda Company v. Ruckelshaus, 292

Regulations for the control of hydrocarbon emissions from stationary sources: a critical review, 469
Otto Cycle
Economic impact of mass production of alternative low emission automotive power systems, 216
Oxidants
Evaluation of an ion selective electrode monitor for total oxidants, 836
Ozone, Concentration
Rural and urban ozone relationships in New York state, 564
Ozone, Determination
Methodology for comparison of open-path monitors with point monitors, 1044
Ozone, Vegetation Effects
Viable system of biological indicators for monitoring air pollutants, 576
Particle Dynamics
Particle-molecule collection by sonic flow impingers, 569
Some effects of electrostatic charges in fabric filtration, 1164
Particle Size Distribution
New fabrics and their potential application, 1187
Nomogram for relating particle and particle cloud parameters, 680
Prediction of overall collection efficiency of air pollution control devices from fractional efficiency curves, 758
Particulates
Collection efficiency as a function of particle size, shape, and density: theory and experience, 1156
Designing a filter system to meet specified efficiency and emissions levels, 1168
Effects of water injection arrangement on the performance of a venturi scrubber, 943
Emission standards for particulates, 1142
Engineering design of fine particle scrubbers, 929
Filtration of airborne particulates by gravel filters: I. initial collection efficiency of a gravel layer, 1051
Fine particle collection efficiency related to pressure drop, scrubbant and particle properties, and contact mechanism, 939
Fine particle scrubbing. proceedings: symposium on the use of wet scrubbers for the control of fine particles, 925
Fine particulate removal and SO_2 absorption with a two stage wet scrubber, 966
Fine particulates—the misunderstood air pollutant, 927
Flux force condensation aspirative wet scrubbing of submicron particles, 952
Flux force-condensation scrubbing, 946
Future needs for fine particle scrubber capabilities, 975
Laboratory generation of particulates with emphasis on submicron aerosols, 1170
New fabrics and their potential application, 1187
New kinds of fabric filtration devices, 1192
Panel discussion, 976
Performance of wet scrubbers on liquid and solid particulate matter, 961
Rotating concentric "homogeneous turbulence" gas scrubber, 969
Scattering coefficient and mass concentration of smoke from Australian forest fires, 1047
Significance of particulate emissions, 1141
Some effects of electrostatic charges in fabric filtration, 1164
Submicron particulate scrubbing with a two phase jet scrubber, 954
Particulates, Emissions Control
Commonwealth of Pennsylvania, Department of Environmental Resources v. Pennsylvania Power Company, 908
Measurement of opacity and particulate emissions with an on-stack transmissometer, 865
Performance and cost comparisons between fabric filters and alternate particulate control techniques, 1144
Resistivity problems in electrostatic precipitation, 313
Particulates, Measurement
Mean drop size in a full scale venturi scrubber via transmissometer, 934
Methods for determining particulate mass and size properties: laboratory and field measurements, 1172
Particulates, Sampling
Mobile fabric filter system: design and preliminary results, 1177
Pennsylvania
Commonwealth of Pennsylvania, Department of Environmental Resources v. Pennsylvania Power Company, 908
Performance Testing
Collection efficiency as a function of particle size, shape, and density: theory and experience, 1156
Performance and cost comparisons between fabric filters and alternate particulate control techniques, 1144
Performance of a steam-ejector scrubber, 958
Performance of wet scrubbers on liquid and solid particulate matter, 961
Petrochemicals
Characterization of the odor properties of 101 petrochemicals using sensory methods, 979
Petroleum Industry
See Refineries
Photochemical Pollutants
Airborne survey of major air basins in California, 645
Inhibition of photochemical smog. II. inhibition by hexafluorobenzene, nitrobenzene, naphthalene, and 2,6-di-tert-butyl-4-methylphenol, 772
Photochemical Reactions
Regulations for the control of hydrocarbon emissions from stationary sources: a critical review, 469
Rural and urban ozone relationships in New York state, 564
Photochemical Smog
Inhibition of photochemical smog. I. Inhibition by phenol, benzaldehyde, and aniline, 357
Inhibition of photochemical smog. II. inhibition by hexafluorobenzene, nitrobenzene, naphthalene, and 2,6-di-tert-butyl-4-methylphenol, 772
Photolysis
Fluorocarbons in the Los Angeles basin, 591
Pilot Plants
Fine particulate removal and SO_2 absorption with a two stage wet scrubber, 966
Performance and cost comparisons between fabric filters and alternate particulate control techniques, 1144
Plants
See Biological Indicators, Vegetation Effects
Platinum
Applicability of commercially available catalysts for removing sulfur dioxide from flue gases, 248
Political Aspects
Background, preparation and use of environmental impact statements, a review, 111
On being the right size, 638
State standards, regulations, and responsibilities in noise pollution control, 130
Pollutant Transport
Temporal and spatial variation in sulfur dioxide concentrations on suburban Long Island, New York, 586
Pollution Control Programs
Crisis in air pollution manpower development, 825
Power Plants
See Electric Power Plants
Precipitators, Design
Hot versus enlarged electrostatic precipitation of fly ash: a cost-effectiveness study, 115
Prediction Systems
Ambient air quality and automotive emission control, 849
Measuring and predicting cooling tower drift and its deposition: state-of-the-art, 855
Prediction of overall collection efficiency of air pollution control devices from fractional efficiency curves, 758
Printing Processes
Evaluation of emissions and control technologies for the web offset (lithography) process, 484
Evaluation of emissions and control technologies for the metal decorating process, 579
Radiation, Microwave
Biological effects of microwave radiation, 122
Discussion of "biological effects of microwave radiation", 128
Railroads
EPA proposes rail noise standards, 881
Rankine Cycle
Economic impact of mass production of alternative low emission automotive power systems, 216
Rats
Barium retention in rats exposed to combustion products from diesel fuel containing a barium-based antismoke additive, 40
Reaction Kinetics
Inhibition of photochemical smog. II. inhibition by hexafluorobenzene, nitrobenzene, naphthalene, and 2,6-di-tert-butyl-4-methylphenol, 772
Reaction Mechanisms
Removal of SO_2 from low sulfur coal combustion gases by limestone scrubbing, 29
Refineries
EPA sets final emissions standards for new plants in seven industries, 362
Regenerative Free Turbine
Economic impact of mass production of alternative low emission automotive power systems, 216
Regional Problems
Airborne survey of major air basins in California, 645
Approach to air quality management standards, 1039
Regression Analysis
Commentary on "hot" versus "enlarged" electrostatic precipitation of fly ash: a cost-effectiveness study, 872
Commentary on "hot" versus "enlarged" ESP of fly ash: author's reply, 875
Regulations
Anaconda Company v. Ruckelshaus, 292
Computer assisted air quality enforcement, 1084
EPA promulgates final regulations for indirect air pollution sources, 363
Regulations for the control of hydrocarbon emissions from stationary sources: a critical review, 469
Regulations for the control of odors: a critical review, 456
Southern Illinois Asphalt Company, Inc. v. Environmental Protection Agency, 630
State standards, regulations, and responsibilities in noise pollution control, 130
Texas regulation requires control of opacity using instrumental measurements, 601
What are we doing? 1030
Research and Development
Needed research in fabric filtration, 1194
Resistivity
See Electrical Properties
Resistivity Measurement
Resistivity problems in electrostatic precipitation, 313
Rural Pollutant Levels
Evaluation of nationwide health costs of air pollution and cigarette smoking, 1063
Rural and urban ozone relationships in New York state, 564
Salvage
Alton and Southern Railway Company v. Illinois Pollution Control Board, 292
Samplers
See also High Volume Samplers
Diffusion losses of sulfur dioxide in sampling manifolds, 245
Laboratory performance analysis of simulated ambient SO_2 bubbler samples: a survey, 1073
Samplers, Design
Inexpensive remote sequential air sampler, 776
Sampling Systems
Atmospheric sample pumps—a possible source of error in total hydrocarbon, methane, and carbon monoxide measurement, 983
San Francisco
Computer program for projections of

vehicular pollutant emissions in urban areas, 54
Scattering Coefficient
Scattering coefficient and mass concentration of smoke from Australian forest fires, 1047
Scentometers
Regulations for the control of odors: a critical review, 456
Scrubbers
See also Venturi Scrubbers, Flux Force-Condensation Scrubbers, Jet Scrubbers, Steam Ejector Scrubbers
Entrainment separators for scrubbers, 971
Fine particle collection efficiency related to pressure drop, scrubbant and particle properties, and contact mechanism, 939
Fine particle scrubbing, proceedings: symposium on the use of wet scrubbers for the control of fine particles, 925
Fine particulate removal and SO_2 absorption with a two stage wet scrubber, 966
Fine particulates—the misunderstood air pollutant, 927
Flux force condensation aspirative wet scrubbing of submicron particles, 952
Future needs for fine particle scrubber capabilities, 975
Panel discussion, 976
Performance of a steam-ejector scrubber, 958
Performance of wet scrubbers on liquid and solid particulate matter, 961
Removal of SO_2 from low sulfur coal combustion gases by limestone scrubbing, 29
Rotating concentric "homogeneous turbulence" gas scrubber, 969
Submicron particulate scrubbing with a two phase jet scrubber, 954
Scrubbers, Design
Effects of water injection arrangement on the performance of a venturi scrubber, 943
Engineering design of fine particle scrubbers, 929
Entrainment separators for scrubbers, 971
Flux force-condensation scrubbing, 946
Rotating concentric "homogeneous turbulence" gas scrubber, 969
Sewage Disposal
EPA sets final emissions standards for new plants in seven industries, 362
Signal Detection Theory
Measurement of rapid changes of odor concentration by a signal detection approach, 162
Site Selection
Network requirements for the St. Louis regional air pollution study, 228
Size Separation
Portable electrical analyzer for size distribution measurement of submicron aerosols, 1067
Smelters
EPA sets final emissions standards for new plants in seven industries, 362
Reader v. Magma-Superior Copper Company, 394
Smoke Measurement
Measurement of opacity and particulate emissions with an on-stack transmissometer, 865
Smoke Problems
Scattering coefficient and mass concentration of smoke from Australian forest fires, 1047
Smoke Shade
Air pollution patterns in New York City, 148
Western Alfalfa Corporation v. Air Pollution Variance Board, 532
Smoking
Evaluation of nationwide health costs of air pollution and cigarette smoking, 1063
Socioeconomic Aspects
Background, preparation and use of environmental impact statements, a review, 111
Four crises: air pollution, energy, cost of living, and confidence in government, 104
Source Inventories
How complaint statistics can assist source identification, 256
Surface air pollutant concentration frequency distributions: implications for urban modeling, 48
Spectrophotometric Analysis
Spectrophotometric determination of atmospheric acidity by displacement of the equilibrium of acid-base indicators, 671
Spectroscopy
Measurement of exhaust emissions in piston and diesel engines by dispersive spectroscopy, 136
Stacks
The Georgia tall stack standard and the energy crisis, 479
Stack Sampling
Measurement of opacity and particulate emissions with an on-stack transmissometer, 865
Standards
See also Noise Standards
Air quality data analysis system for interrelating effects, standards, and needed source reductions—part 2, 551
Approach to air quality management standards, 1039
EPA sets final emissions standards for new plants in seven industries, 362
Evaluating compliance with air pollution levels "not to be exceeded more than once a year", 559
State standards, regulations, and responsibilities in noise pollution control, 130
The Georgia tall stack standard and the energy crisis, 479
Standards, Automotive Emissions
Ambient air quality and automotive emission control, 849
New approach to setting vehicle emission standards, 841
State of the Art
Measuring and predicting cooling tower drift and its deposition: state-of-the-art, 855
State Problems
Support your local pollution control agency, tax assessor, speed trap, or whatever, 407
Stationary Sources
"Clean air and energy—what next?", 542
Costs of air cleaning with electrostatic precipitators at TVA steam plants, 339
Hagedorn v. Union Carbide Corporation, 394
Metropolitan Washington Coalition for Clean Air v. Department of Economic Development, 1121
Regulations for the control of hydrocarbon emissions from stationary sources: a critical review, 469
Texas regulation requires control of opacity using instrumental measurements, 601
Statistical Analysis
Evaluating compliance with air pollution levels "not to be exceeded more than once a year", 559
How complaint statistics can assist source identification, 256
Steam Ejector Scrubbers
Performance of a steam-ejector scrubber, 958
Steam Power Plants
See Electric Power Plants
St. Louis
Network requirements for the St. Louis regional air pollution study, 228
Wind fields over the St. Louis metropolitan area, 232
Storage Tanks
EPA sets final emissions standards for new plants in seven industries, 362
Submicron Particles

Sulfur Dioxide
Air pollution patterns in New York City, 148
Applicability of commercially available catalysts for removing sulfur dioxide from flue gases, 248
Sensitivity of native desert vegetation to SO_2 and to SO_2 and NO_2 combined, 153
Sulfur Dioxide, Concentration
Temporal and spatial variation in sulfur dioxide concentrations on suburban Long Island, New York, 586
Sulfur Dioxide, Emissions Control
Commonwealth of Pennsylvania, Department of Environmental Resources v. Pennsylvania Power Company, 908
Removal of SO_2 from low sulfur coal combustion gases by limestone scrubbing, 29
The Georgia tall stack standard and the energy crisis, 479
Sulfur Dioxide, Monitoring
Diffusion losses of sulfur dioxide in sampling manifolds, 245
Sulfuric Acid
Spectrophotometric determination of atmospheric acidity by displacement of the equilibrium of acid-base indicators, 671
Sulfur Oxides, Emissions Control
Anaconda Company v. Ruckelshaus, 292
Surveys
Airborne survey of major air basins in California, 645
Tax Treatment
Taxing emissions: a theoretical note, 44
Technical Council
Activities mean opportunity, 6
Temperature Effects
Extending fabric filter capabilities, 1182
Nitric oxide formation at high temperatures, 237
Tennessee Valley Authority
Costs of air cleaning with electrostatic precipitators at TVA steam plants, 339
Testes Damage
Biological effects of microwave radiation, 122
Texas
Texas regulation requires control of opacity using instrumental measurements, 601
Thermodynamics
Nitric oxide formation at high temperatures, 237
Transmissometer
Mean drop size in a full scale venturi scrubber via transmissometer, 934
Measurement of opacity and particulate emissions with an on-stack transmissometer, 865
Texas regulation requires control of opacity using instrumental measurements, 601
Transportation
